

Review distribution by years & change over time

Note: number reviews from 2005, 2006, 2007 were excluded due to minimal review counts, which would otherwise distort the trend and year-over-year growth rates

Contribution of reviews by star category over time (%)

2019-2020 had higher share from 1 and 5 star ratings than other years while contributions from 2-4 star ratings slightly decreased. This signals some degree of sentiment polarization post-Covid i.e., people form stronger opinions overall.

Share of reviews without any funny and useful votes across time (%)

Rising share of reviews receiving no Funny or Useful votes is observed since 2019, which reflects an increasing reactiveness from Yelp users towards other users' opinions.
